

Virtual Tour Features

One-click Defurnish

Using AI to digitally remove furniture and clutter from a space, revealing a clean, open layout that helps buyers or tenants better understand the property's true potential, without needing the current tenant to clean and vacate the property.

Explore the space in this unfurnished mode, or switch it off anytime.

Measure & Plan Furnitures

Automatically dimension lengths, depths and heights of rooms, including openings of windows and doors. Add manual dimensions to the spaces to give buyers the opportunity to plan out their furniture and envision themselves and their belongings living in the property.
